

Introduction

Contarra Systems is a worldwide telecommunications converging technology company specialized in the design and development of multipurpose communications and convergence solutions.

Contarra's technology and solutions allow companies, telecommunications carriers, ISP's and integrators to develop new and competitive value-added services better than ever.

We provide convergence solutions with maximum flexibility and scalability and thereby enable our customers to rapidly develop vertical applications.

Contarra's solutions are hardware and operating system independent and existing third party hardware can be re-used, without loss of investment.

Contarra's unmatched technologies and solutions allow large companies, telecommunications carriers and integrators to develop new and competitive value-added services, on all major operating systems (Windows NT/2000, Linux, Solaris), using major third parties voice and IP boards. Our technologies and solutions are currently deployed in high-end market segments like networking and telecommunications and include the most advanced technologies available today:

Interactive Voice Response	Speaker verification	Voice over IP (VoIP)
Speech recognition	Unified Messaging solutions	ATM
Text-to-Speech	Inbound and outbound fax	SNMP based network management support
	Matrix conferencing	

Market trends and solutions

Contarra Systems recognizes a number of important market trends in the telecommunications market:

Access to services - In the coming years, the vast majority of consumers around the world will have the option of immediate access to eServices

Market acceptance - Widespread acceptance of convergence technology is achieved through realistic ROI, reliability and worldwide coverage

Mobile solutions - The innovative use of mobile technologies will play an increasingly important role in the success of eServices

Multi-Channel - eBusiness has been absorbed into the broader framework of multi-channel value chain optimization

Contarra Systems

Fax: +31.35.543.3001

With the knowledge of these market trends, the use of tele-communications convergence technology will play an important role in fulfilling customer demand and in the development of new services. Contarra Systems provides solutions in infrastructure services and multi-channel applications that fit like a glove with respect to consumer needs.

Contarra's solution key benefits

The solutions of Contarra Systems come with a number of important key benefits to our business partners and customers:

Development - Develop best-in-class converging solutions better and faster than ever before

Time-to-market - Shorten the time-to-market of applications for our customers and partners

Total cost of ownership - Reduce the all-in costs of next generation converging communications solutions

Redeployment – Reuse existing 3rd party hardware and software in Contarra's open architecture

Freedom of choice – Run hardware and operating system independent

Quality - Offer our partners and customers high quality of service

Availability - Provide carrier-grade solutions with high up times
